

2025 Pavement Management Initiative

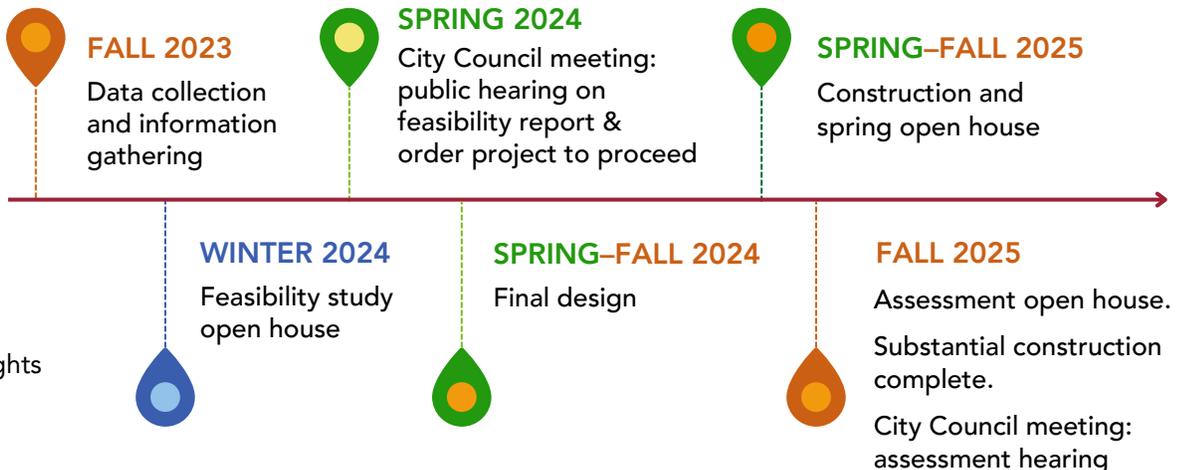

Street Project Kick-off

The City of Inver Grove Heights is currently planning for 2025 pavement rehabilitation projects as a part of the citywide Pavement Management Initiative (PMI). The proposed project areas and included streets are shown on the map to the right. In this first phase of the project, we will gather project information, prepare a feasibility study, and engage with you, our residents. As project details become clearer, we will mail an invitation to residents for a neighborhood meeting, so that you can learn more about the project. A tentative project schedule is also provided below.

Over the next few weeks, you may see City staff, surveyors, and geotechnical crews gathering information on your street. This information will be used to determine the appropriate approach for the street improvements.
